## About King of the Road

Dayton Air Control Products manufacturers King of the Road™ – the original Delco leveling and Height Control Valve. Built to last and backed by the industry's only 30 month limited warranty.

### Height Control Valves – are not created equally

Ask for “The King” by name and you will experience ‘the difference’:

- Reduced maintenance costs – longer HCV life.
- Reduced energy required by air compressor – designed for low air consumption.
- Reduced HCV installation costs – parts may be customized for your exact application.

### The King delivers

**Flexibility:** dead-band and time delay set to your specifications.

**Ease of Use:** adjustable arm, custom mounting and air fittings allow for ease of installation.

**Safety:** over-travel design protects the valve from extreme axle movement.

**Smart Design:** built-in delay ignores transient road conditions to ensure minimum air consumption.

## Customized HCV - like no other to save you money!

### Mounting Brackets and Control Arms –

can be configured for your specific application eliminating the need for additional hardware.

### Intake Check Valves –

added to prevent backflow when the air supply is shutoff or disconnected, and eliminates the need for a secondary valve in the system.

### Fittings –

select from SAE, NPT, DOT, Tube and Push-to-connect fittings.

### Air Consumption –

choose time delay to reduce air consumption or a non-delay version for quick response.

### Precision Ride Height –

neutral zone (dead-band) can be reduced to control variations in vehicle height to maintain accurate suspension geometry.

## Control Links

Our link assemblies come in many configurations and lengths to fit your needs.

Links can be supplied in the exact length required for your application. No adjustment is required saving you time and money.

High quality steel and a rubber bushing system are the ingredients of a long lasting, durable link assembly for your suspensions.

## You will be in good company

Mack, Peterbilt, Volvo, Kenworth, MCI, Paccar, Gillig Corp., Prevost/Novabus, Orion, Daimler Bus North America, North American Bus Industries and New Flyer are all King of the Road customers.

## The Industry's leading warranty

Our 100,000 miles / or 30 month warranty is the longest warranty in the industry.

## Applications

- Vehicle Air Ride Suspension
- Seismic Equipment Installation
- Commercial Laundry Leveling
- Vibration Control
- Fluid Level Control
- **Let us design a Valve & Control Link for your application!**
